German

🎓 EDUCATION

Master of Engineering, Computer Science INSA, INSA Toulouse

2016 – 2021 | Toulouse, France

Exchange Semester, Linköping Universitet

August 2018 – January 2019 | Linköping, Sweden

🔑 INTERESTS

Music, Sport, Nature & Travel, Gaming, Reading and Writing

📁 PROFESSIONAL EXPERIENCE

January 2025 – present
Montpellier, France

Crédit Agricole Technologies et Services, Software Engineer

Software Engineer within OSE squad working on consuming, enriching and providing banking operations through APIs to be consumed and displayed by several clients, such as Crédit Agricole web client or mobile application.

- Development and maintenance of Spring Boot micro services following an event-driven architecture using Apache Kafka and Domain Driven Design
- Part of a team following scrum principles with daily meetings, sprint plannings, backlog refinement meetings and sprint retrospective using Jira
- Participation in the process of delivering banking micro services applications to production as a software engineer
- Maintenance of development and production environments running on Kubernetes and using ArgoCD following the GitOps workflow, in collaboration with the DevOps team
- Monitoring, analysis, and bug resolution of production environments using Grafana and Kibana
- Planning and participation of performance tests to scale environments, anticipate technical issues in production and follow existing SLAs

Tech Stack: Java, Spring Boot, Maven, Elasticsearch, Apache Kafka, Domain Driven Design, Event Driven Architecture, Grafana, ArgoCD, Gitlab, Kubernetes

September 2024 –
October 2024
Montpellier, France

Zefir, Software Engineer

Full Stack Developer in the Acquisition Business Unit.

Tech Stack: Node.js, React, PostgreSQL, Linear, Notion, Google Cloud Platform

Lyra Network

May 2021 –
November 2023
Toulouse, France

Software Engineer

Software Engineer within Payment Mean Europe team.

- Development and maintenance of payment applications in a critical codebase
- Development and maintenance of the Continuous Integration pipeline with Jenkins
- Development of the Alma payment application integrated into Payzen
- Onboarding of new members
- Participation in the process of delivering payment method applications to production as a developer and tester
- Analysis and bug resolution as N3 technical support

February 2021 – May 2021 Toulouse, France	• Writing and maintaining technical documentation on Confluence • Implementation of a monitoring dashboard with Grafana/Prometheus to monitor several functional indicators for a payment method application • Integration of e2e TestCafé tests into the deployment process to facilitate deployments and improve their frequency <u>Tech Stack</u>: Java EE, Spring Boot, Gradle, Maven, Javascript, Docker, Ansible, Jenkins, TestCafé Software Engineer Intern Analysis, development, and production of the FullCB payment method application integrated into the Payzen payment platform. • Planned the migration by defining User Stories • Developed E2E tests with TestCafé as Smoke Test and Non-Regression Test • Configured Sonarqube to ensure code quality and security • Implemented the Continuous Integration pipeline with Jenkins • Implemented the deployment pipeline with Ansible and Docker • Carried out an acceptance phase on several test environments to ensure that the application is working properly • Monitored the migration phase in production • Within a team of 5 engineers and 1 manager • Followed Agile Method (Daily, Spring, Retro) with Jira <u>Tech Stack</u>: Java EE, Spring Boot, Gradle, Maven, Javascript, Docker, Ansible, Jenkins, TestCafé
June 2020 – September 2020 Toulouse, France	Infotel, Software Engineer Intern Developed a voice assistant integrated into an IOT application to improve the user experience and make it easier to obtain information. • Defined and developed the voice assistant requests • Developed AWS Lambda in Node.js to process the voice assistant requests • Developed the UI to configure the voice assistant in Angular • Refactored the backend to integrate the voice assistant code • Developed an integration test suite using Postman • Within a team of 3 engineers and 1 tech lead <u>Tech Stack</u>: Amazon Alexa, AWS Lambda, Node.js, Angular, Docker, MariaDB
 PROJECTS	
May 2019 – June 2024	Developing a commercial PC game https://store.steampowered.com/app/1900320/Lumnis/ Development of an Action-Adventure game started during my studies, and published on Steam. <u>Tech Stack</u>: Unreal Engine, C++
January 2024 – February 2024	Developing an open source library  https://www.npmjs.com/package/save-to-drive  Development of an open source library to upload files and folders to Google Drive <u>Tech Stack</u>: Node.js, Google Drive API
December 2021 – present	Writing technical blog posts  https://gauthier-cassany.com/posts  Wrote technical blog posts based on my professional experience and personal projects. <u>Topics</u>: Spring Boot, Next.js, React.js, Keycloak, Docker, Maven Developing and maintaining Wild Moose Games website  https://www.wildmoosegames.com/  <u>Tech Stack</u>: Next.js, React.js, Css Modules, Github Action, Vercel Developing and maintaining a portfolio website  https://gauthier-cassany.com/  <u>Tech Stack</u>: Next.js, React.js, CSS Modules, Github Action, Sentry, Vercel
September 2020 – December 2020	Detecting anomalies in air traffic network frames End-of-study project in collaboration with Activus • Within a team of 5 students • Designed and set up the software architecture as a team

- Developed microservices with Spring Boot and Spring Cloud
- Developed the data processing pipeline to feed Machine Learning algorithms with Spark and Python
- Implemented the Continuous Integration pipeline with Jenkins

Tech Stack: Spring Boot, Spring Cloud, Microservice Architecture, REST API, Elastic Search, Python, Jenkins

SKILLS

Nest.js

Javascript — Vanilla, Node.js, Typescript

React.js & Next.js

Java

Spring & Spring Boot

Maven

Gradle

Hibernate

HTML & CSS

Tailwind CSS

Angular

Go

C++

Git

Linux

SQL — MariaDB, PostgreSQL
